The plot plan should include the project location including distances to roads (right-of-way) and property lines, other structures on the property and septic systems and wells. The dimensions of the project should be included as well as a scale. Once I receive the completed application and plot plan, I will inspect the site to insure that the proposed project is consistent with Franklin Township's Zoning Ordinance. After my visit I will contact you and inform you of the status.

Please note that this is a zoning permit application only. You may need to obtain a building permit form the Code Inspections Inc. Office. Their number is 547-0488. Please call their office to see if a building permit is required.

Upon completion of the project I must be notified in writing. I will-then inspect the project to insure that it was completed as permitted.
