EPA and DEP here for Precision property updates. Ann DeNato from EPA spoke on behalf of Precision. Injections have shown that the levels have dropped to 11 P.P.B. in most areas. Water flow pattern causes the levels up in some areas due to the heavy rain. The first 80% to 85% of injections to clean up is the easiest, the remainder is always the hardest. **Mrs. Sansky** questioned the safety of the water by the little league area. If children and animals go in the water? Per Ann DeNato said the levels are down and more animals and critters are living in creek. **Malcolm MacGregor** asked **Ann DeNato** to explain, **Dave Jennings** asked to put in writing on the Precision Website, should there be signs at the creek and to post health issues.

Ryan Mitvalsky said there are 3 wells on Little League property. Why can't he have a 3rd party samples on all property? Precision Attorney K. Quinn will not allow anyone. Was told discuss with Kevin. Malcolm MacGregor suggest good relations with all. EPA is making Precision do all the testing. Court order to clean site. Ryan was supposed to be sent all the results on testing. Wants to know what is going on. Malcolm suggest Little League attorney inforce agreement to get info from EPA and Precision. Also informed that home wells are not on the web sites for precision. The eventual goal is beneficial in the active monitoring for lower levels in the creek. A map was provided to the supervisors from Ann. Eric from EPA is going to set up at the next township meeting prior to meeting to show whomever is interested to see the wells and what the sites are showing. Answer questions. This is going to be at 6:30 PM on August 15, 2016.
